PlastiTrackBES

Plastics REIMAGINED

**Community Plastic Recovery, Digital Tracking &
Youth/Women-Led Upcycling**

DPI-SGP 2.0 Innovation Challenge (Top 10 Finalist)

The Deep-Rooted Problem

Nigeria generates **>2.5 Million tonnes** of plastic waste annually. Less than **10%** is formally recovered.

- **Informal Settlements Suffer:** Communities like *Kuchingoro* *Garamajiji* face severe drainage blockages, flooding, and open burning.
- **The Missing Link:** Awareness campaigns fail without **visible infrastructure** and **economic incentives**.
- **Exclusion:** Women and youth—the backbone of these communities—are completely sidelined from the formal circular economy value

Our Comprehensive Solution

PlastiTrackBES is a highly scalable, community-based recovery system powered by strict digital tracking and a tangible reward economy.

1. **Recovery Hubs:** Safe, localized collection centers managed by women.
2. **Digital Accountability:** Live, transparent tracking of every kilogram of PET, HDPE, and PP.

Supported By Global Mandates

Our project doesn't just collect plastic; it executes the exact mandates of our esteemed funders and partners:

- **Global Environment Facility (GEF):** Driving grassroots environmental sustainability and systemic change.
- **UNDP:** Aligning local circular economy initiatives directly with the Global SDGs.
- **SGP Nigeria:** Empowering community-based environmental protection initiatives.
- **Digital Peers International (DPI):** Project Incubator driving the

Local Execution Partners & Ecosystem

Strong alliances on the ground driving day-to-day operations.

- **Abuja Environmental Protection Board (AEPB):** Collaboration on municipal waste management permits and collection logistics.
- **AMAC Municipal Council:** Local government endorsement and provision of safe hub spaces in Kuchingoro and Durumi.
- **Local Eco-Clubs:** Active school partnerships embedding recycling habits in preteens and teens directly in schools.

Track Record: Successful Sensitization

Phase 1: Preteen & Teen Creative Upcycling

We didn't start with apps; we started with minds. Our initial target audience was preteens and teens.

We trained them on creative upcycling—turning plastic waste into high-quality wall-decors and accessories. **Why?** Because when they see that their choices can clean an environment *and* decorate a room, they show immense, lasting interest in the circular economy.

Milestone: World Earth Day 2026

Partnering with the **Climate Teen Hub**, we commemorated World

Waste 2 Wonder Partnership

- **Global Reach:** We taught teens from multiple countries (the vast majority from Nigeria).
- **Core Focus:** Turning pure waste into art, focusing heavily on PET bottles—the largest

Media & National Recognition

Our work is already turning heads at a national level:

- **Award Nomination:** PlastiTrackBES has been officially nominated for a prestigious environmental impact award.
- **National Radio Broadcast:** Our Assistant Team Lead was invited by **Kiss FM** to discuss the vital work we do, projecting our model to thousands of listeners across the country.

We are not just a concept; we are a recognized, moving force.

Platform Metrics & Data

Real-time data verifying our community impact.

HOUSEHOLDS

The ReVamp! Upcycling Store

Closing the loop means giving waste absolute value. We manufacture highly affordable, beautiful products to encourage Nigerians to buy local, recycled goods.

- **Recycled Keychains:** Vibrant, durable daily-use items. (₦2,000)
- **Upcycled Earrings:** Elegant PET eco-jewelry. (₦3,000)
- **Recycled Bangles:** Fashionable HDPE bands. (₦4,500)
- **PET Broom:** Durable and eco-friendly broom made from repurposed PET plastic bottles. (₦10,000)
- **ReVamp Trial Discs:** Demonstrating structural integrity for future

Sustainable Business Model

Multiple revenue streams to ensure financial independence.

- **Upcycled Product Sales (B2C & B2B):** Selling premium upcycled items (Earrings, Keychains, Home decor, Eco-Pavers) to green consumers and corporate partners for branded ESG gifting.
- **Raw Material Supply:** Selling clean, color-sorted PET flakes and HDPE shredded regrind to large-scale manufacturers.
- **Traceability as a Service (TaaS):** Charging B2B FMCG partners a subscription to trace their EPR (Extended Producer Responsibility) compliance points live on our dashboard.

Financial Sustainability & Exit Plan

Transitioning from pilot funding to self-sustaining circular operations.

- **18-Month Break-Even:** Moving to a fully self-sustained operational model financed entirely by upcycled product sales and corporate EPR contracts.
- **EPR (Extended Producer Responsibility) Integration:** Serving as a licensed recovery partner for beverage companies needing to fulfill national plastic recycling quotas.
- **Verifiable Carbon Offsets:** Monetizing verified plastic diversion data

Eco-Friendly Green Computing MVP

Innovative technology aligned with environmental preservation.

- **Low-Carbon Hosting:** The PlastiTrackBES platform is hosted in green cloud regions running on 100% renewable wind and solar energy.
- **Client-Side Eco Mode:** A functional user toggle that disables heavy CPU animation loops and graphic repaints, saving device battery power by up to 25%.
- **Next is Static Compilation:** Server rendering overhead is reduced

The Future: Scaling PlastiTrackBES

With the **DPI-SGP 2.0 Top 10 Funding**, we will aggressively scale:

1. **Scale Hub Infrastructure:** Deploy robust aggregation tools and digital scales to existing and new informal settlement hubs.
2. **Expand the ReVamp Facility:** Invest in high-capacity shredders and extruders to move from accessories to eco-pavers and furniture.
3. **The Replication Toolkit:** Package our proprietary software, Google Auth onboarding, and community methodology for rapid deployment across all 36 Nigerian states

Thank You.

Let's Build a Circular Nigeria, Together.
