

PlastiTrackBES

Plastics REIMAGINED

**Community recovery hubs, live digital tracking, and premium local
upcycling**

The Urban Plastic Crisis

In Nigeria, over **2.5 million tonnes** of plastic waste are generated annually, but less than **10%** is recovered.

- **Informal Settlement Impact:** Drainage systems in hubs like Kuchingoro and Durumi are completely clogged, leading to severe flooding and open burning of toxic waste.
- **The Core Blockers:** Traditional clean-up campaigns fail because there is **no visible neighborhood infrastructure** and **no economic incentive** for behavioral change.
- **Sidelined Communities:** Local women and youth—who bear the worst economic brunt—are locked out of the circular economy value chain.

THE OPPORTUNITY

Diverting Waste to Wealth

The Closed-Loop Solution

We bridge the gap between waste collection and high-margin upcycled retail through three key layers:

1. **Decentralized Hubs:** Safe collection points managed by trained local women, providing an immediate cash-for-plastic exchange.
2. **Digital Ledger Tracking:** A public database logging every transaction. Contributors build profile accounts, earn points, and view municipal statistics.
3. **ReVamp! Upcycling Store:** Converts recovered raw plastics into premium consumer goods, proving waste has high aesthetic value.

Powerhouse Team & Global Mandates

Our project executes the exact circular and empowerment directives of our sponsors:

- **** Blessn Evea Signature (BES) Team:**** Blessing Evea Onwe (Lead/Creative), Bethel Clement (Product/Data), Kenneth Nyong (Ecosystem), and Wakala Bilkisu (Operations).
- **GEF & UNDP SGP Nigeria:** We execute SGP's mandate by creating community-based climate action and empowering women with a **60% income increase**.
- **Digital Peers International (DPI):** Project incubator driving digital circular models.

Proven Track Record & Sensitization

We built community trust and raw material source channels before writing a single line of code:

- **Youth Upcycling Bootcamps:** Trained preteens and teens in Abuja on creative upcycling, turning PET offcuts into wall decor and accessories.
- **World Earth Day 2026:** Partnered with the **Climate Teen Hub** for the global *Waste 2 Wonder* initiative, demonstrating PET bottle transformation to hundreds of youth.
- **National Media Feature:** Our Assistant Team Lead discussed our circular tracking technology on **Kiss FM**, building solid public credibility.

Live MVP Platform & Metrics

Our live Next.js Vercel platform displays our verified circular data:

- **Interactive Eco-Calculator:** Slide raw plastic weights (PET, HDPE, PP) to see instant CO₂ avoided and landfill volume saved.
- **Public Impact Dashboard:** Real-time data showing **48.6k kg of plastic recovered**, **1,200 households enrolled**, and **₦2.4M rewards issued**.
- **Green Onboarding:** Contributors track personal plastic weight history, points, and download official environmental certificates.

ReVamp! Catalog: June Arrivals & BES

Premium upcycled items with exact plastic weight diverted and CO₂ offset calculations:

UPTEx JUNE

Wristbands (Wristbeads)

¥1,500 per unit

PET bottle offcuts cut into beads. Diverts **12g plastic** | Saves **18g CO₂**.

UPTEx JUNE

Earrings Collection

¥2,500 per pair

Molded PET on branded display cards. Diverts **8g plastic** | Saves **12g CO₂**.

UPTEx JUNE

Artist Palette + Brush Set

¥5,000 per set

HDPE brush holder + PET cap wells. Diverts **185g plastic** | Saves **277g CO₂**.

Verified Traceability & Ledger Data

Our platform maps every transaction. Searching any receipt ID (e.g., `PT-642189` or `PT-702315`) displays a live vertical stepper:

1. **Collection:** Logged at Kuchingoro Hub by Aisha M. (June 10)
2. **Ledger Registry:** Weighed, recorded, and points issued.
3. **Depot Processing:** Cleaned, color-sorted, and prepped.
4. **Artisanal Crafting:** Assembled at the UpTex Workshop (June 14).
5. **Secure Order Delivery:** Checked out by customer today, June 15.

LIVE JUNE ENTRY

Order PT-642189 (Wristbeads)

Viabile Business Model & Scale

We achieve financial sustainability and eliminate grant reliance through three revenue streams:

- **Upcycled Product Sales:** Selling high-margin items (Earrings, Paver Discs, Brooms, Loop Games) to B2C consumers and B2B corporate partners for ESG gifting.
- **Raw Material Supply:** Selling clean, color-sorted shredded PET flakes and HDPE crushed regrind to large-scale industrial plastic manufacturers.
- **Traceability-as-a-Service (TaaS):** Monthly subscription dashboard for FMCG companies to track their local EPR recovery points.

SCALE GOAL

18-Month Break-Even

Eco-Friendly Green Computing MVP

We believe digital platforms should not contribute to the carbon footprints they aim to solve:

- **Low-Carbon Hosting:** The PlastiTrackBES platform is hosted in cloud regions running on 100% renewable wind and solar energy.
- **Client-Side Eco Mode Toggle:** Interactive switch that disables intensive animations and rendering loops, saving device CPU battery by up to **25%**.
- **Next.js Static Compilation:** Server rendering overhead is reduced to zero by pre-rendering public pages (SSG/ISR), preventing database compute cycles.
- **OLED Energy Savings:** Built-in Dark Theme reduces screen brightness power usage by up to **60%** on mobile displays.

Thank You.

Let's Build a Circular Nigeria, Together.
